

Preliminary program

Monday, 4 April

12:00 – 17:30 **Scientific Preparation Session – Part I:** Review of NAWDEX preparatory case studies to improve flight strategies and forecasting tools

Tuesday, 5 April

08:00 – 10:00 **Scientific Preparation Session – Part II:** Review of NAWDEX preparatory case studies to improve flight strategies and forecasting tools

10:00 – 17:30 **Campaign Implementation Session**

- Discussion with instrument PIs: review requirements by the instruments for NAWDEX flight strategies
- Presentation of the “new” instrument specMACs
- Information by the DLR flight facility: update on status of permissions, realization of flights, information about the NAWDEX schedule, etc
- Discussion about the forecaster and instrument operator teams in Iceland
- Information on Accommodation, Offices, etc

Wednesday, 6 April

08:00-12:00 **Forecaster’s Training Event**

- Presentation of forecasting products
- Review of the tools based on a preparatory case
- Information and discussion about NAWDEX flight planning process

All sessions of the workshop are open to everybody. We would appreciate if a representative of each instrument, the DLR FX project engineers and FX operations could participate in the Campaign Implementation Session on Tuesday. Colleagues providing forecast products and/or planing to participate in Iceland are asked to join the Forecaster’s Training Event on Wednesday.
